The municipal judge shall order the impoundment, the muzzling in accordance with subsection (d) and/or the confinement of the animal accused of being in violation of this section in a manner and location that will insure that it is no threat to persons or other animals pending the outcome of the hearing. If such impoundment, muzzling or otherwise safe confinement is not possible or if prior court orders to restrain such animal have gone unheeded, the municipal judge may order the animal immediately destroyed.

(d) Vicious Dogs to be Muzzled: It shall be the duty of every owner, keeper or harborer of any dog in the city, which dog is vicious or has been known to bite, chase, or run after any person or animal in the streets, alleys, or any public place in the city, to keep the same muzzled with a good and sufficient wire or leather muzzle, securely fastened so as to wholly prevent such dog from biting any animal or person until such time as a determination has been made by the court as to whether the dog is vicious or not. Any person owning, keeping or harboring any dog within the city limits contrary to this section shall be guilty of a violation of this code.

(e) Immediate Destruction: Nothing in this chapter shall be construed to prevent the animal control officer or any law enforcement officer from taking whatever action is reasonably necessary to protect himself or herself or members of the public from injury or danger, including immediate destruction of any vicious animal without notice to the owner.

(f) Release of: If a complaint has been filed in the municipal court against the owner of an impounded animal for a charge under this section, the animal shall not be released except on the order of the municipal judge, who may also direct the owner to pay all impounding fees in addition to any penalties for violation of this chapter. The municipal judge may, upon making a finding that an animal is vicious or that it represents a clear and present danger to the citizens or to other animals in the community, order the animal to be destroyed in a humane manner by the animal shelter. Surrender of an animal by the owner thereof to the animal control officer does not

relieve or render the owner immune from the decision of the court, nor to the fees and fines which may result from a violation of this section.
(Code 1989)

2-116. **RUNNING AT LARGE.** It shall be unlawful for any person to willfully allow any animal or fowl under his or her control to be or to run at large within the city. Any animal or fowl found at large shall be impounded as provided in section 2-117 or 2-207 (dogs). (Code 1989)

 (d) The animal control officer shall each month submit a report to the city clerk showing the number of animals impounded and disposed of, and the fees collected pursuant to this article and shall pay those fees to the city clerk for credit to the general operating fund.
(Code 1989)

2-118. **REDEMPTION OF IMPOUNDED ANIMALS.** At any time before the sale or destruction of any animal impounded under the provisions of this article, except for animals impounded under sections 2-115 (vicious) and 2-119 (rabid), the owner thereof may redeem the animal by paying the animal control officer or any person in charge, the impounding fee and all costs incurred as a result of such impoundment. (Code 1989)

if not, the local health officer shall authorize the release of the animal upon payment by the owner of the boarding fee therefore. The health officer may authorize the keeping of any such animal on the owner's premises if the owner produces a rabies vaccination certificate showing that the animal has valid rabies vaccination protection. If the city clerk has not received any protest against the kennel, the city clerk may issue a renewal of an existing kennel license at the same location without any report from the animal control officer and zoning code enforcement officer. If the animal control officer or the zoning code enforcement officer finds that the holder of any kennel license is violating any zoning law, or any other law of the State of Kansas, or of the city, or is maintaining the facility in a manner detrimental to the health, safety or peace of mind of any person residing in the immediate vicinity, he or she shall report such fact to the city clerk, and the license shall not be renewed except after a public hearing before the governing body.

(2) Containing more than 350 parts per million by weight of suspended solids, or

(3) An average daily flow greater than two percent (2%) of the average sewage flow of the city, shall be subject to the review of the Foreman. If such flow occurs, the owner shall provide, at his expense, such preliminary treatment as may be necessary to reduce the biochemical oxygen demand to 300 parts per million by weight, reduce the suspended solids to 350 parts per million by weight, or control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Foreman and no construction of such facilities shall be submitted for the approval of the Foreman and no construction of such facilities shall be commenced until said approvals are obtained in writing.

(Ord. 571)

(a) If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Sections 14-227 through 14-227.2, inclusive, and which in the judgment of the Foreman, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life to constitute a public nuisance, the Foreman may:

- (1) Reject the wastes,
- (2) Require pretreatment to an acceptable condition for discharge to the public sewers,
- (3) Require control over the quantities and rates of discharge, and/or,
- (4) Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Section 14-233 of the Article.

(b) If the Foreman permits the pretreatment of equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Foreman, and subject to the requirements of all applicable codes, ordinances and laws.

In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hours composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.) (Ord. 571)
- 14-233. **SAME; SPECIAL PROVISIONS.** No statement contained in this article shall be construed as preventing any special agreement or arrangement between the city and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the city for treatment, subject to payment therefore, by the industrial concern. (Ord. 571)

14-237. EASEMENTS: RIGHT TO ENTER. The Foreman and other duly authorized employees of the city bearing proper credentials and identification shall be permitted to enter all private properties through which the city holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. That portion of the total user charge which is designated for operation and maintenance including replacement, of the treatment works shall be established by this article.
- 14-304. OPERATION, REPLACEMENT ACCOUNTS. That portion of the total user charge collected which is designated for operation and maintenance, including replacement, as established in Sections 14-306 through 14-310 shall be deposited in a separate non-lapsing fund known as the Operating, Maintenance, and Replacement Fund and will be kept in two primary accounts as follows: (a) An account designated for the specific purpose of defraying operation and maintenance costs of the treatment works "Operation and Maintenance Account."

Deposits in the Replacement Account shall be made annually, or more often as the Council may elect, from the operation, maintenance, and replacement revenue. (Ord. 778)
- 14-305. SAME; BALANCE. Fiscal year end balances in the Operation and Maintenance Account and the Replacement Account shall be carried over to the same accounts in the subsequent year, and shall be used for no other purpose than those designated for these accounts. Monies which have been transferred from other sources to meet temporary shortages in the Operation, Maintenance, and Replacement Fund shall be returned to their respective accounts upon appropriate adjustment of the user charge rates of operation, maintenance, and replacement. The user charge rate shall be adjusted such that the transferred monies will be returned to their respective accounts within the fiscal year following the fiscal year in which the monies were borrowed.
- 14-306. USER FEES. Each user shall pay for the services provided by the city based on his use of the treatment works as determined by water meters acceptable to the city. The user rates established in this article shall apply to all users of the city's treatment works regardless of where such user may be located.
- 14-307. SAME; RESIDENTIAL. For residential contributors, monthly user charges will be based on average monthly water usage during the months of December, January and February. - 14-309. SAME; INDUSTRIAL. For industrial and commercial contributors, user charges shall be based on water used during the current month. If a commercial or industrial contributor has a consumptive use of water, or in some other manner uses water which is not returned to the Wastewater Treatment System, the user charge for that contributor may be based on a wastewater meter or separate water meter installed and maintained at the contributor's expense and in a manner acceptable to the city. The proof of use is up to the contributor, at his expense.
- 14-310. SAME; MINIMUM. The minimum charge per month shall be \$15.95 for 300 cubic feet of water. For usage beyond the minimum charge, each contributor shall pay a user charge rate for operation and maintenance including replacement of \$3.25 per 100 cubic feet of water. (Ord. 797, Section 1, Ord 882)
- 14-311. POLLUTANT CHARGE. Any user which discharges any toxic pollutants which cause an increase of the cost of managing the effluent or the sludge from the city's wastewater treatment works, or any user which discharges any substance which singly or by interaction with other substances causes identifiable increases in the cost of operation, maintenance, or replacement of the treatment works, shall pay for such increase costs, directly proportional to the cost of the plant operation, maintenance, and replacement as the additional substance increases the cost. This shall be as determined by the responsible Plant Operating Personnel and approved by the City Council.
- 14-312. ANNUAL REVIEW. The city will review the user charge system every year and revise user charge rates as necessary to ensure that the system generates adequate revenues to pay the costs of operation and maintenance including replacement and that the system continues to provide for the proportional distribution of operation and maintenance including replacement costs among users and user classes.
- 14-313. SAME; NOTICE TO CUSTOMER. The city will notify each user at least annually, in conjunction with a regular bill, of the rate being charged for operation and maintenance including replacement of the treatment works.

No such plat or replat or dedication or deed of street or publicway shall be filed with the register of deeds as provided by law until such plat or replat or dedication or deed shall have endorsed on it the fact that it has first been submitted to the city planning commission and by the commission to the governing body of the city and by the governing body duly approved. Before exercising the powers referred to above, the city planning commission shall adopt regulations governing the subdivision of land within its jurisdiction. Such regulations may provide for the proper area of streets in relation to other existing or planned streets and to the mapped plan for adequate and convenient open spaces for traffic, utilities, access of fire fighting apparatus, recreation, light, and air, and for the avoidance of congestion of population, including minimum width and area of lots. (Ord. 326, Sec. 5)

18-106. BUDGET OF EXPENDITURES. On or before July 1st of each year the city planning commission shall submit to the governing body of the city its budget of expenditures for the ensuing fiscal year, itemizing the expense and amounts and the purpose. The governing body shall thereupon consider the budget and make such allowance to the city planning commission as it shall deem proper and shall add the same to the general budget of the city. (Ord. 326, Sec. 6)

ARTICLE 4. ZONING REGULATIONS

18-401. INCORPORATION BY REFERENCE. The book entitled "Standard Zoning Code with Subdivision Regulations, 1984 Edition" as amended by Ordinance No. 667 is hereby incorporated by reference for the purposes of providing for the promotion of the public health, safety, order and general welfare of the residents of the city; the preservation and protection of property values throughout the city; the regulation and restriction of the size and dimensions of buildings located within the city; the division of the city into zoning districts; the regulation and restriction of the location and use of buildings and the use of land within each zoning district; and the providing of penalties for the violation thereof, all pursuant to K.S.A. 12-707 *et seq.* No fewer than three copies of the above-described book with copies of all ordinances amending the same shall be marked "Official Copy" and filed with the city clerk. Such copies shall be available for inspection by the public at all reasonable hours. (Ord. 625, Secs. 2:3; Ord. 667, Sec. 1)

18-402. ZONING DISTRICT MAP. The boundaries of districts are as shown on a map entitled "Zoning Map of Oberlin, Kansas," which is certified by and filed in the office of the city clerk and which with all explanatory information thereon is hereby made a part of this article. The zoning map shall be kept and maintained by the city clerk and shall be available for inspection by the public at all reasonable hours. (Ord. 625, Sec. 4)

18-403. BOARD OF ZONING APPEALS. See Ordinance No. 326.

ARTICLE 5. FLOOD DAMAGE PREVENTION

18-501. STATEMENT OF PURPOSE. It is the purpose of this article to promote the public health, safety and general welfare and to minimize flood losses by applying the provisions of this article to:

(a) Restrict or prohibit uses which are dangerous to health, safety, or property in times of flooding or cause undue increase in flood heights or velocities.

(b) Require that uses vulnerable to floods, including public facilities which serve such uses, be provided with flood protection at the time of initial construction.

(c) Protect individuals from buying lands which are unsuited for intended purposes because of flood hazard.

(d) Assure that eligibility is maintained for property owners in the community to purchase flood insurance in the National Flood Insurance Program.
(Ord. 694, Sec. 1)

18-502.

DEFINITIONS. Unless specifically defined below, words or phrases used in this article shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

Actuarial or Risk Premium Rates means those rates established by the administrator pursuant to individual community studies and investigations which are undertaken to provide flood insurance in accordance with Section 1307 of the Act and the accepted actuarial principles. Risk premium rates include provisions for operating costs and allowances.

Appeal means a request for a review of the city administrator's interpretation of any provision of this ordinance or a request for a variance.

Area of Shallow Flooding means a designated AO or AH zone on a community's Flood Insurance Rate Map (FIRM) with a one percent or greater annual chance of flooding to an average depth of one to three feet where a clearly defined channel is unpredictable and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Area of special flood hazard is the land in the flood plain within a community subject to one percent or greater chance of flooding in any given year.

Base flood means the flood having one percent chance of being equaled or exceeded in any given year.

Development means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations.

Existing construction means (for purposes of determining rates) structures for which the start of construction commenced before the effective date of the FIRM or before January 1, 1975, for FIRM's effective before that date. Existing construction may also be referred to as existing structures.

Existing manufactured home park or subdivision means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is complete before the effective date of the floodplain management regulations adopted by a community.

Flood or flooding means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) The overflow of inland or tidal waters.
- (2) The unusual and rapid accumulation or runoff of surface waters from any source.

Flood Insurance Rate Map (FIRM) means an official map of a community, on which the Flood Insurance Study has delineated the Flood Hazard Boundaries and the zones establishing insurance rates applicable to the community.

Flood Insurance Study is the official report provided by the Federal Emergency Management Agency. The report contains flood profiles, as well as

the Flood Boundary/Floodway Map and the water surface elevation of the base flood.

Floodway or Regulatory Floodway means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

Floodway Fringe is that area of the flood plain, outside of the floodway, that on the average is likely to be flooded once every 100 years (i.e., that has a one percent chance of flood occurrence in any one year).

Freeboard means a factor of safety usually expressed in feet above a flood level for purposes of flood plain management. Freeboard tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, clogged bridge openings, and the hydrological effect of urbanization of the watershed.

Highest Adjacent Grade means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

Historic Structure means any structure that is: (a) listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; (b) certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district; (c) individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or (d) individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either: (1) by an approved state program as determined by the Secretary of the Interior; or (2) directly by the Secretary of the Interior in states without approved programs.

Lowest Floor means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirement of this article.

Manufactured Home means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For flood plain management purposes the term "manufactured home" also includes park trailers, travel trailers, and other similar vehicles placed on a site for greater than 180 consecutive days. For insurance purposes the term "manufactured home" does not include park trailers, travel trailers, and other similar vehicles.

Manufactured Home Park or Subdivision means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

New Construction means for the purpose of determining insurance rates, structures for which the start of construction or substantial improvement commenced on or after the initial FIRM or after December 31, 1974, whichever is

later, and includes any subsequent improvements to such structures. For floodplain management purposes, new construction means structures for which the start of construction commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.

Overlay District is a district in which additional requirements act in conjunction with the underlying zoning district(s). The original zoning district designation does not change.

Start of Construction (for other than new construction or substantial improvements under the Coastal Barrier Resources Act (Pub. L. 97-348)), includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

Structure means a walled and roofed building that is principally above ground, as well as a mobile home, and a gas or liquid storage tank that is principally above ground.

Substantial Damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

Substantial improvement means any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either, (1) before the improvement or repair is started, or (2) if the structure has been damaged and is being restored, before the damage occurred. For the purpose of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include either (1) any project for improvement of a structure to comply with existing, state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions, or (2) any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

Variance is a grant of relief to a person from the requirements of this ordinance which permits construction in a manner otherwise prohibited by this ordinance where specific enforcement would result in unnecessary hardship. (Ord. 694, Sec. 12)

18-503. GENERAL PROVISIONS. (a) Lands to Which this Article Applies. This article shall apply to all lands within the jurisdiction of the city limits identified on

the Flood Insurance Rate Map (FIRM) as numbered and unnumbered A Zones (including AE, AO and AH Zones) and within the Zoning Districts FW and FF established in Section 16-505 of this article. In all areas covered by this article no development shall be permitted except upon a permit to develop granted by the city council or its duly designated representative under such safeguards and restriction and the city council or the designated representative may reasonably impose for the promotion and maintenance of the general welfare, health of the inhabitants of the community and where specifically noted in sections 16-506:507 and 18-509.

(b) The Enforcement Officer. The city administrator of the community is hereby designated enforcement officer under this article.

(c) Rules for Interpretation of District Boundaries. The boundaries of the floodway and floodway fringe overlay districts shall be determined by scaling distances and the official zoning map or on the Flood Insurance Rate Map or Floodway Map. Where interpretation is needed to the exact location of the boundaries of the districts as shown on the official zoning map, as for example where there appears to be a conflict between a mapped boundary and actual field conditions, the enforcement officer shall make the necessary interpretation. In such cases where the interpretation is contested, the board of zoning appeals will resolve the dispute. The regulatory flood elevation for the point in question shall be on the governing factor in locating the district boundary on the land. The person contesting the location of the district boundary shall be given a reasonable opportunity to present his or her case to the board and to submit his or her own technical evidence, if he or she desires.

(d) Compliance. No development located within known flood hazard areas of this community shall be located, extended, converted or structurally altered without full compliance with the terms of this article and other applicable regulations.

(e) Penalties for Noncompliance. No structure or land shall hereafter be constructed, located, extended, converted, or altered without full compliance with the terms of this article and other applicable regulations.

(f) Abrogation and Greater Restrictions. It is not intended by this article to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this article imposes the greater restrictions, the provision of this article shall prevail. All other articles inconsistent with this article are hereby repealed to the extent of the inconsistency only.

(g) Interpretation. In their interpretation and application, the provisions of this article shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted under state statutes.

(h) Warning and Disclaimer of Liability. The degree of flood protection required by this article is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or the flood height may be increased by man-made or natural causes, such as ice jams and bridge openings restricted by debris. This article does not imply that areas outside floodway and floodway fringe district boundaries or land uses permitted within such will be free from flooding or flood damages. This article shall not create liability on the part of the city or any officer

or employee thereof for any flood damages that may result from reliance on this article or any administrative decision lawfully made thereunder.

(i) Appeal. Where a request for a permit to develop or a variance is denied by the city administrator the applicant may apply for such permit or variance directly to the board of zoning appeals.

Violation of the provisions of this article or failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with grants of variances or special exceptions) shall constitute a violation of this code. Any person who violates this article or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500, and in addition, shall pay all costs and expenses involved in the case. Each day such violation continues shall be considered a separate offense.

Nothing herein contained shall prevent the city or other appropriate authority from taking such other lawful action as is necessary to prevent or remedy any violation. (Ord. 694, Secs. 2:10)

18-504.

ADMINISTRATION. (a) Establishment of a Development Permit. A development permit shall be obtained before construction or development begins within any area of special flood hazard established in 18-503. No person, firm, or corporation or unit of government shall initiate any development or substantial improvement or cause the same to be done without first obtaining a separate permit for each development as defined by 18-502. To obtain a floodplain development permit, the applicant shall first file an application therefore in writing on a form furnished for that purpose. Every such application shall:

- (1) Identify and describe the work to be covered by the floodplain development permit.
- (2) Describe the land on which the proposed work is to be done by lot, block, tract and house and street address, or similar description that will readily identify and definitely locate the proposed building or work.
- (3) Indicate the use or occupancy for which the proposed work is intended.
- (4) Be accompanied by plans and specifications for proposed construction.
- (5) Be signed by the permittee or his or her authorized agent who may be required to submit evidence to indicate such authority.
- (6) Give such other information as reasonably may be required by the city administrator (i.e., require a statement from the applicant that they are aware that elevating or floodproofing structures above the minimum levels will result in premium reduction, especially in the case of nonresidential floodproofing when a minus one foot penalty is assessed at the time of rating the structure for the policy premium.)

(b) Designation of the Local Administrator. The city administrator is hereby appointed to administer and implement the provisions of this article, by granting or denying development permit applications in accordance with its provisions.

(c) Duties and Responsibilities of City Administrator. Duties of the city administrator shall include, but not be limited to:

- (1) Review all development permits to assure that sites are reasonably safe from flooding and that the permit requirements of this article have been satisfied.
 - (2) Review permits for proposed development to assure that all necessary permits have been obtained from those federal, state or local governmental agencies from which prior approval is required.
 - (3) When base flood elevation data has not been provided in accordance with 18-503, section (b), then the city administrator shall obtain, review, and reasonably utilize any base flood elevation data available from a federal, state or other source, in order to administer the provisions of 18-505:510.
 - (4) Verify, record and maintain record of the actual elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures.
 - (5) Verify, record and maintain record of the actual elevation (in relation to mean sea level) to which the new or substantially improved structures have been floodproofed.
 - (6) When floodproofing is utilized for a particular structure the city administrator shall obtain certificate from a registered professional engineer or architect.
 - (7) Notify adjacent communities and the Kansas Water Resources Board prior to any alteration or relocation of a watercourse, and shall submit evidence of such notification to the Federal Emergency Management Agency.
 - (8) Assure that maintenance is provided within the altered or relocated portion of the watercourse so that the flood carrying capacity is not diminished.
 - (9) Where interpretation is needed as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions) the city administrator shall make the necessary interpretation. The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this article.
- (d) Variance Procedures.
- (1) The board of zoning appeals as established by the city shall hear and decide appeals and requests for variances from the requirements of this article.
 - (2) The board of zoning appeals shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the city administrator in the enforcement or administration of this article.
 - (3) Any person aggrieved by the decision of the board of zoning appeals or any taxpayer may appeal such decision to the district court as provided in K.S.A. 12-759 and 12-760.
 - (4) In passing upon such applications, the board of zoning appeals shall consider all technical evaluations, all relevant factors, standards specified in other sections of this article, and:

- (a) the danger that materials may be swept onto other lands to the injury of others;
- (b) the danger to life and property due to flooding or erosion damage;
- (c) the susceptibility of proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
- (d) the importance of the services provided by the proposed facility to the community;
- (e) the necessity to the facility of a waterfront location, where applicable;
- (f) the availability of alternative locations, not subject to flooding or erosion damage, for the proposed use;
- (g) the compatibility of the proposed use with existing and anticipated development;
- (h) the relationship of the proposed use to the comprehensive plan and flood plain management program for that area;
- (i) the safety of access to the property in times of flood for ordinary and emergency vehicles;
- (j) the expected heights, velocity, duration, rate of rise and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and,
- (k) the costs of providing governmental services during and after flood conditions including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water systems, and streets and bridges.

(5) Conditions for Variances

- (a) Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items (b-f below) have been fully considered. As the lot size increases beyond the one-half acre, the technical jurisdiction required for issuing the variance increases.
- (b) Variances may be issued for the reconstruction, rehabilitation or restoration of structures listed on the National Register of Historic places or the State Inventory of Historic Places, without regard to the procedures set forth in the remainder of this section.
- (c) Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.
- (d) Variances shall only be issued upon determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- (e) Variances shall only be issued upon (i) a showing of good and sufficient case, (ii) a determination that failure to grant the variance would result in exceptional hardship to the

applicant, and (iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public, or conflict with existing local laws, codes or ordinances.

(f) Any applicant to whom a variance is granted shall be given a written notice that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation.

(Ord. 694, Secs. 3,8)

18-505. ESTABLISHMENT OF ZONING DISTRICTS. The mapped flood plain areas within the jurisdiction of this article are hereby divided into the two following districts: a floodway overlay district (FW) and a floodway fringe overlay district (FF) identified in the Flood Insurance Study and accompanying map. Within these districts all uses not meeting the standards of this article and those standards of the underlying zoning district shall be prohibited. These zones shall be consistent with the numbered and unnumbered A Zones (including AE, AO and AH Zones) as identified on the official FIRM and identified in the Flood Insurance Study provided by the Federal Emergency Management Agency. (Ord. 694, Sec. 4)

18-506. STANDARDS FOR THE FLOODWAY OVERLAY DISTRICT AND THE FLOODWAY FRINGE OVERLAY DISTRICT. (a) No permit for development shall be granted for new construction, substantial improvements and other improvements including the placement of manufactured homes within all numbered and unnumbered A Zones (including AE, AO and AH Zones) unless the conditions of this section are satisfied.

(b) All areas identified as unnumbered A Zones on the FIRM are subject to inundation of the 100-year flood; however, the water surface elevation was not provided. The unnumbered A Zones shall be subject to all development provisions of this article. If Flood Insurance Study data is not available the community shall utilize any base flood elevation or floodway data currently available from federal, state or other sources.

(c) New construction, subdivision proposals, substantial improvements, prefabricated buildings, placement of manufactured homes and other developments shall require:

(1) Design or anchorage to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

(2) New or replacement water supply systems and/or sanitary sewage systems be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems be located so as to avoid impairment or contamination.

(3) Construction with materials resistant to flood damage, utilizing methods and practices that minimize flood damages, and with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located

so as to prevent water from entering or accumulating within the components during conditions of flooding.

(4) All utility and sanitary facilities be elevated or floodproofed up to the regulatory flood protection elevation.

(5) That until a floodway has been designated, no development including landfill, may be permitted within Zones A1-30 and AE on the city's FIRM unless the application for the land use has demonstrated that the proposed use, when combined with all other existing and reasonably anticipated uses, will not increase the water surface elevation of the 100 year flood more than one foot on the average cross section of the reach in which the development or landfill is located as shown on the Flood Insurance Rate Study incorporated by reference.

(6) Storage and Material and Equipment:

(A) The storage or processing of materials that are in time of flooding buoyant, flammable, explosive, or could be injurious to human, animal or plant life is prohibited.

(B) Storage of other material or equipment may be allowed if not subject to major damage by floods and firmly anchored to prevent flotation or if readily removable from the area within the time available after flood warning.

(7) Subdivision proposals and other proposed new development, including manufactured home parks or subdivisions, be required to assure that (i) all such proposals are consistent with the need to minimize flood damage, (ii) all public utilities and facilities, such as sewer, gas, electrical, and water systems are located, elevated and constructed to minimize or eliminate flood damage, (iii) adequate drainage is provided so as to reduce exposure to flood hazards, and (iv) proposals for development (including proposals for manufactured home parks and subdivisions) of five acres or 50 lots, whichever is lesser, include within such proposals the regulatory flood elevation.

(Ord. 694, Sec. 5)

18-507. FLOODWAY FRINGE OVERLAY DISTRICT (Including AO and AH Zones).

(a) Permitted Uses.

(1) Any use permitted in section 18-509 shall be permitted in the Floodway Fringe Overlay District. No use shall be permitted in the district unless the standards of section 18-506 are met.

(b) Standards for the Floodway Fringe Overlay District.

(1) Require new construction or substantial improvements of residential structures to have the lowest floor, including basement, elevated to or above one foot above the base flood elevation.

(2) Require new construction or substantial improvements of nonresidential structures to have the lowest floor, including basement, elevated to or above one foot above the base flood elevation or, together with attendant utility and sanitary facilities, to be floodproofed so that below such a level the structure is water tight with walls substantially impermeable to the passage of water and with structural components having the capability of resisting hydrostatic and

hydrodynamic loads and effects of buoyancy. A registered professional engineer or architect shall certify that the standards of this subsection are satisfied. Such certification shall be provided to the official as set forth in section 18-504.

(3) Require for all new construction and substantial improvements that fully enclosed areas below the lowest floor that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria: A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters.

(4) Within AH Zones adequate drainage paths around structures on slopes shall be required in order to guide floodwaters around and away from proposed structures.

(c) Require that manufactured homes to be placed or substantially improved on sites in an existing manufactured home park or subdivision within Zones A1-30, AH and AE on the community's FIRM that are not subject to the provisions of section 18-510(b) be elevated so that either:

(1) The lowest floor of the manufactured home is at or above one foot the base flood elevation; or

(2) The manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than 36 inches in height above grade and be securely anchored to an adequately anchored foundation system in accordance with the provisions of section 18-510(a).

(Ord. 694, Sec. 6)

18-508. SPECIAL FLOOD HAZARD AREAS. Located within the areas of special flood hazard are areas designated as AO Zones. These areas have special flood hazards associated with base flood depths of one to three feet where a clearly defined channel does not exist and where the path of flooding is unpredictable and indeterminate; therefore, the following provisions apply within AO Zones:

(a) All new construction and substantial improvements of residential structures have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as one foot the depth number specified in feet on the community's FIRM (at least two feet if no depth number is specified).

(b) All new construction and substantial improvements of nonresidential structures shall:

(1) Have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as one foot the depth number specified in feet on the community's FIRM (at least two feet if no depth number is specified), or

(2) Together with attendant utility and sanitary facilities be completely floodproofed to or above that level so that any space below that level is watertight with walls substantial impermeable to the passage of water and with structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy. Such certification shall be provided to the officials set forth in section 18-504.

(c) Adequate drainage paths structures on slopes shall be required in order to guide floodwaters around and away from proposed structures.
(Ord. 694, Sec. 6)

18-509. FLOODWAY OVERLAY DISTRICT. (a) Permitted Uses: Only uses having a low flood damage potential and not obstructing flood flows shall be permitted within the floodway district to the extent that they are not prohibited by any other ordinance. All encroachments, including fill, new construction, substantial improvements and other developments must be prohibited unless certification by a professional registered engineer or architect is provided demonstrating that encroachments shall not result in any increase in flood levels during occurrence of the base flood discharge. No use shall increase the flood levels of the regulatory flood elevation. These uses are subject to the standards of sections 18-506:507. The following are recommended uses for the floodway district.

(1) Agricultural uses such as general farming, pasture, nurseries, forestry.

(2) Residential uses such as lawns, gardens, parking and play areas.

(3) Non-residential areas such as loading areas, parking, airport landing strips.

(4) Public and private recreational uses such as golf courses, archery ranges, picnic grounds, parks, wildlife and nature preserves.

(5) In Zone A unnumbered, obtain, review and reasonably utilize any floodway data available through federal, state or other sources or section 18-566(c)(7) of this article, in meeting the standards of this section.

(Ord. 694, Sec. 7)

18-510. MANUFACTURED HOMES.

(a) All manufactured homes shall be anchored to resist flotation, collapse, or lateral movement. Manufactured homes must be anchored in accordance with state and local building codes and FEMA guidelines. In the event that over-the-top frame ties to ground anchors are used, the following specific requirements (or their equivalent) shall be met:

(1) Over-the-top ties be provided at each of the four corners of the manufactured home, with two additional ties per side at intermediate locations and manufactured homes less than 50 feet long requiring one additional tie per side;

(2) Frame ties be provided at each corner of the home with five additional ties per side at intermediate points and manufactured homes less than 50 feet long requiring four additional ties per side;

- (3) All components of the anchoring system be capable of carrying a force of 4,800 pounds; and
- (4) Any additions to the manufactured home be similarly anchored.
- (b) Require that all manufactured homes to be placed within Zones A1-30, AH, and AE on the community's FIRM.
 - (1) Outside of a manufactured home park or subdivision;
 - (2) In a new manufactured home park or subdivision;
 - (3) In an expansion to an existing manufactured home park or subdivision; or
 - (4) In an existing manufactured home park or subdivision on which a manufactured home has incurred substantial damage as the result of a flood, be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above one foot the base flood elevation; and be securely anchored to an adequately anchored foundation system in accordance with the provisions of section 18-510(a).

Be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the base flood elevations; and be securely anchored to an adequately anchored foundation system in accordance with the provisions of section 18-505(c)(4)(a).
(Ord. 668, Art. 5; Ord. 694, Sec. 6)

- 18-511. NON-CONFORMING USE. (a) A structure or the use of a structure or premises which was lawful before the passage or amendment of Ordinance 694 but which is not in conformity with the provisions of this code may be continued subject to the following conditions:
- (1) No such use or substantial improvement of that use shall be expanded, changed, enlarged, or altered in a way which increases its non-conformity.
 - (2) If such use is discontinued for 12 consecutive months, any future use of the building premises shall conform to this article.
