

### IMPORTANT NOTICE: NEX-TECH NETWORK DEVELOPMENT WORK COMING TO YOUR NEIGHBORHOOD

Hello!

We are excited to announce that deployment of Nex-Tech's fiber-optic network in your town is underway. This letter means that work has begun in and around your area and will continue over the next several weeks.

#### Who is Nex-Tech?

Nex-Tech is a trusted Kansas broadband and technology company connecting customers by offering affordable, reliable, and fast Internet, TV, and phone service through a 100% fiber-optic network. Since 1951, Nex-Tech has been offering local service, transparency in rates and speeds, and a promise of responsiveness second to none.

#### How can I identify Nex-Tech construction?

Nex-Tech has partnered with engineering, construction, and boring companies for this project. These teams will have Nex-Tech-approved contractor signage on their vehicles.

**For everybody's safety, we request that the public maintain a safety perimeter of at least 30 feet from vehicles and areas of work.**

#### What is going to happen in my neighborhood?

You may see utility locators in your area taking note of gas, electric, water, and sewer equipment. Physical "locates" will either be paint marks that will fade over time or flags in the ground. Please do not remove the markers from their locations. If you have questions about the locates, please dial 8-1-1 for more information.

You may see heavy equipment driving in your neighborhood to provide materials and support the construction crews. They will begin installing fiber pathways along existing public rights of way and utility easements using directional boring, plowing and trenching methods.

We will be installing pedestals in the alleys and easements to contain the fiber equipment. These boxes are necessary to splice fiber cables along the fiber routes. Often the pedestals will be co-located next to existing utilities for minimum overall impact.

Crews will install fiber network equipment, restore landscaping, and clean up after themselves. You will be notified if anything out of the ordinary occurs on your property during this process.

#### FOR MORE INFORMATION:

 Nex-Tech Information: 877.625.7872

# What's next?

This is the first in a multi-step process to build the Nex-Tech fiber network. You can alert us of your interest and receive email updates from us by visiting [nex-tech.com/RuralOberlin](http://nex-tech.com/RuralOberlin) and completing the form.

**More information is coming to you soon. We thank you in advance for help with this process and please contact us with questions.**

Whether you call, click, or come into the store, our team is excited to get to know you so we can best serve your Internet needs.

With thanks,  
Your local Nex-Tech team
